Urea Blending: PRIME STABLE™ DUAL ACTION may be used to treat urea prior to application in the field-including pretreatment. Under certain temperature and humidity conditions, urea blended with PRIME STABLE™ DUAL ACTION may stick together. Application of urea to the field is recommended soon after treatment for best results.

UAN Solutions: PRIME STABLE™ DUAL ACTION may be mixed with liquid fertilizers such as aqua ammonia or other liquid ammoniacal or urea nitrogen fertilizers. Liquid fertilizers containing high levels of phosphate should not be used with PRIME STABLE™ DUAL ACTION. If pesticides are added to the tank mix in conjunction with liquid fertilizers, a compatibility jar test should be performed prior to large scale application to the field.
